Atlanta, GA

Full-stack Web developer who enjoys solving problems with a creative mind and critical thinking skills, capable of creating dynamic applications using a variety of technologies

Projects

Mini City: NFC-driven Data Management Portal

HTML5, CSS, SASS/COMPASS, Bootstrap, Python, Flask/Jinja2, MySQL.

- MVP built at Goodie Nation Hackathon [Gentrification] for Mini City, an organization helping homeless population in metro Atlanta: 1st Place winner in General category
- Successfully communicated with clients and translated a broad idea into specific developmental concepts and process
- Utilizes NFC-tag based Android devices to create and store a user's data
- Deployed using Passenger and Python WSGI to Dreamhost server

HydroSource: Water Subscription Service yalexhwang.com/hydrosource

HTML5, CSS, SASS/COMPASS, UI Bootstrap, Angular.js, Express/Node.js, MongoDB/Mongoose. MVC Single Page Application.

- eCommerce website with fully working basic functionalities (account registration, shopping and payment), with responsive layout
- Implemented sign-in/out state using authentication cookies with a random token
- Used Stripe API for payment processing
- Solved an architectural problem in using Angular router by adding a run block with \$rootScope and \$locationChangeStart

Marti's Study Room: Korean Vocabulary Study yalexhwang.com/marti_study_room

HTML5, CSS, SASS/COMPASS, Angular.js. MVC Single Page Application.

- Web app built to automate the process of creating a quiz for a student I tutor
- Planning to implement database connection to store large amount of vocabulary and a dictionary API
